

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Maria (Maria Martin, Physical Therapist) was an asset to Nick's improving range of motion and use of his arm. She not only worked with Nick but helped me to understand and learn what we can do to help Nick. She was a lot of fun and Nick loved his "play" time with Maria. We'll miss her!

Jon's vocabulary and speaking skills increased a lot since Genie (Genie Ruddle, Speech-Language Pathologist) started therapy sessions. Genie also pointed out that Jon talks through his nose which is something he still has to work on. Genie had lots of good tricks and games that helped Jon improve. But best of all, Jon just loved Genie. He looked forward to the sessions and had fun during the sessions. Genie was very patient considering Jon had a short attention span. We were very satisfied.

Wyomi (Wyomi Yonzon Yockey, Pediatric Vision Screener) was a pleasure. She worked well with the children and the parent volunteers. Thank you for having this program for the schools!

* * * * *

Brian (Brian Ferri-Taylor, Physical Therapist) has been a wonderful help with my son. He is absolutely the best. I am thankful for the Elks and thankful to Brian.

It was nice having LEEANNE (Leeanne Cadwallader, Pediatric Vision Screener) here. She was very friendly and patient with the children. Thank you for offering such a great opportunity for the families here.

A coin a day so they can walk, talk, see and play!
