

## NEWS FROM YOUR ELKS MAJOR PROJECT . . .

The music therapy used by our occupational therapist was a major success for our son. Prior to this therapy he panicked in public regularly and held his hands over his ears most of the day, and bit his fingers raw. After a couple of months of this therapy Andy began to show improvements in all of these areas. Now he can go out in public without panicking, he doesn't chew on his fingers, and he gets into and out of the car on his own. (Mavis Johnson, Occupational Therapist)

Anna (Anna Galvan, Pediatric Vision Screener) continues to be a very special part of our school. We look forward to her friendly, competent visit each year. Thank you for supporting this most valuable service to preschool children. Each year we find five or more children that need additional services. Just think of what that means to a child that without your program would not begin to read. Anna is a fantastic representative for your program. Thank you again.

I would like to take the time to thank Anna Galvan (Speech-Language Pathologist) on coming out annually to conduct our vision screening for our preschool children. She always is very professional and is very respectful. She also does a wonderful job with our preschoolers and she's very patient. Thank You.
