

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Wyomi (Wyomi Yonzon Yockey, Pediatric Vision Screener) was very professional and worked very well with our children. We are so pleased to have her and we hope to continue a long relationship with her. Thank you so much for this service. Each year your screener identifies several children in need of glasses.

I just want to say thank you to Maria (Maria Martin, Physical Therapist) and to all the staff from California-Hawaii Elks Major Project for helping my baby. God bless all of you. Thank you.

Genie's (Genie Ruddle, Speech-Language Pathologist) services were a success with our son. After three visits we began to see positive changes in his speech, his interest in things around him and he had a vast amount of more questions for us. Genie had some really good suggestions for us to help our son and because we took and used her tools, Ezell has successfully graduated from her speech therapy. This service at first can really offend parents but the end result was progress and self-assurance for our son who is now constantly talking and expressing himself. Thank you Hawaii Elks for your service. Genie was a pleasure to work with. Ezell loves his Aunty Genie.

Thank you so much for coming out each year. I'm very happy we have a program like this. Over the years you have caught something that we did not see and it has made a big difference. (Anna Galvan, Pediatric Vision Screener)
