

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Elks Major Project a blessing in children's lives:

Brian {Brian Ferri-Taylor, Physical Therapist} is awesome! He is very honest about his feelings and will tell you without hesitation. Brian has a way with children that is amazing to me!

The therapy my sixteen-year-old daughter is receiving is making such a difference. She is responding to her therapy by how she is reacting to the outside world. People (teachers, family, friends) are noticing a real positive change. I wish we could have known about her Sensory Integration dysfunction when she was younger. Thanks to Judy's {Judy Linda, Occupational Therapist} treatments, Anna's quality of life has turned for the better.

Preschool vision screenings appreciated:

We sure do appreciate your program. It is so convenient for your Vision Screeners to come out. It's a blessing that your program provides financial assistance for those who cannot afford eye care.

Linda {Linda Pinnell, Pediatric Vision Screener} is always professional and polite as well as wonderfully comforting to any hesitant children. Thank you for this program.

Anna Galvan {Pediatric Vision Screener} is excellent. She is wonderful with our children and staff. Our center and it's parents sincerely appreciate your program.

A coin a day so they can walk, talk, see and play!
