

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Leeanne (Leeanne Cadwallader, Pediatric Vision Screener) was a very friendly person. She worked very well with the children and made them all feel comfortable with the screening. She explained the whole process to them at their level and made it fun for them. She is very good at what she does.

Judy Linda (Occupational Therapist) has helped my son, Daniel, gain the ability to function on a new level. He can write letters, where before he could not hold a pencil. His balance is better and now he is more active and less cautious while moving. He now can ride a two wheel bike. Many of his self stimulating behaviors have decreased due to brushing. He was previously withdrawn and now he is more alert and involved in the world around him. She has taught me so much about helping my son. His life will be forever improved due to her help. Thank you so much to the Elks. This is one of the greatest gifts and help we have ever received.

This is an excellent service (Linda Pinnell, Pediatric Vision Screener). I'm so happy that this opportunity came along. I know some of our children really benefited from your service. Thank you so much.

* * * * *

We are very happy with the services provided. Brian Ferri-Taylor (Physical Therapist) does a great job working with our daughter Morgan. We appreciate all the help he has given us.

* * * * *

Thank you for your services. They are greatly appreciated. Most of our children come from low income families and can't get this kind of service so they are very grateful. Nicole Smith, Pediatric Vision Screener was great screening the students.

A coin a day so they can walk, talk, see and play!
