

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Vision Screenings catch eye problems early!

You have no idea how proud we are to offer this service to our families, and how grateful they are that we do.

Nicole {Nicole Smith, Pediatric Vision Screener} is great. She is so warm and friendly. All of the children felt very comfortable with her.

She caught two possible eye problems with our children. What a great service you provide to our community.

Home-based program wonderful:

Had it not been for Judy Linda {Occupational Therapist} we wouldn't have come this far with diagnosing. She did baseline that Pediatricians were not. His disease is not common and we have struggled until we met Judy Linda. She has been instrumental in the whole picture. I owe her so much and my children love her! Thanks for your special people/program! It's the reason my son is doing better!

Pat {Pat DiMercurio, Physical Therapist} is both professional and very personable. She is able to make physical therapy really fun for Matthew and treats him with kindness and respect. She was responsive to my questions and made helpful suggestions of activities that I could do with Matthew to help his gross motor development. Her knowledge and opinions concerning braces were helpful as we worked to find good braces for Matthew. Having Pat come to our home was both convenient and useful, because it allowed Pat to suggest home-based activities and modifications.

A coin a day so they can walk, talk, see and play!
