

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

My family is very pleased with this program. My child is doing everything the doctor said he would not do thanks to your program. So thank you for having it and I hope a lot more children benefit from it. (Brian Ferri-Taylor, Physical Therapist)

Hedley (Hedley Uetake, Speech-Language Pathologist) is a wonderful speech pathologist. The bond that she had with my daughter really showed in my daughter's speech. My daughter looks forward to every session and worked hard. I am so grateful for Hedley and all that she has done for us.

Genie (Genie Ruddle, Speech-Language Pathologist) does an awesome job working with my child. He loves practicing his speech at home and playing fun games with Genie. Genie helps me to teach my son how to say his letters better. She is very friendly and caring each time we see her and my son looks forward to seeing her each week.

Nicole Smith (Pediatric Vision Screener) is not only professional but she also shows caring and patience. The children were so at ease with the screening. The room was filled with complete involvement from the children, teachers and the vision screener. We love Nicole and the parents always follow through with referrals and appreciate all the help given to them by the Elks project.
