

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Ms. Uetake (Hedley Uetake, Speech-Language Pathologist) was very innovative with her lessons. She kept Janson's attention and made him recognize when he pronounced a word or sound incorrectly. Janson began to correct his sisters when he heard them say a word incorrectly. Ms. Uetake is great with children and taught my husband and me a few lessons. Her help was greatly appreciated.

Katie (Katie Mackay, Vision Screener) was fabulous! She was able to provide clear directions to each student at their individual level. The children enjoyed the screening experience and it was very smooth and quick. Thank you Katie!

This program saved my sanity and I feel so grateful that it exists for children who either can't afford early intervention services or are not being recognized as needing support services. Paula (Paula Rainey, Occupational Therapist) was the first professional to look at my child and acknowledge his disorder. Her evaluation has helped the continued fight for service for my son in a medical world that doesn't acknowledge SPD's existence. I recommend the Elks Major Project to other families that are struggling to find help for their children.

Thank you so much for providing this excellent screening tool for us, free to our families. Leeanne (Leeanne Cadwallader, Vision Screener) found four out of the thirty-two she screened who were referred for additional screening. Leeanne was on time, very professional, positive, helpful, experienced, patient, and thorough. We really appreciate the Elks for being there for us.
