

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Sebastian is much more understandable. His "R" & "Th" sounds are corrected. His tongue slips out ~ 50% of the time with his "S" sounds, but when it is pointed out he corrects it. Previously it came out 100% of the time and he would be very upset if it was pointed out. This therapy was so beneficial to him. We will be eternally thankful to both Headley (Hedley Uetake, Speech-Language Pathologist) and the Elks.

Gina (Gina Murphy, Pediatric Vision Screener) has screened for ATCAA Head Start for many years now and she does a developmentally age appropriate vision screening that is also fun for the children. Gina's screenings ran very smoothly and were professional. Great Job, thank you so much for this service.

I love all the work Valerie (Valerie Haskins, Occupational Therapist) does with Blaze. I have had kids over for play dates and forgotten that Valerie was coming. Valerie included Blaze's friends to also play which has also helped Blaze. Thank you for all the help. Blaze just loves Valerie.

Wyomi (Wyomi Yonzon Yockey, Pediatric Vision Screener) is very efficient, very prepared, a little curt and very business-like. We appreciate your services. Thank you.

Brian (Brian Ferri-Taylor, Physical Therapist) is an amazing physical therapist for our daughter. He started working with her when she was 6 months old and he has a gentle, special way of helping her. I appreciate Brian's positive attitude and I feel like I can ask him any question and also ask for advice. He gives us lots of ideas for activities that we can do with our daughter when he is not there. Our daughter had an MRI done and my husband and I were confused about some of the medical terminology and so he brought us some books about the brain and helped us to understand more. We are lucky to have Brian in our life.
