

## NEWS FROM YOUR ELKS MAJOR PROJECT . . .

I really liked the idea of the pirate patch for the Vision Screening. The kids were more excited about it because they could be a pirate and wear a patch. I would like to see though that maybe they could keep the patch or something similar.

We have found that Tracy's (Tracy Archipley, Speech-Language Pathologist) therapy sessions have helped David. Tracy makes the sessions (speech) enjoyable with music, books, etc. She teaches us (the parents) what vowels David's vocalizing in addition to other sounds since our son is medically fragile and is delayed in development. We hope Tracy can continue to provide therapy. Thanks again for your services.

We think Brian (Brian Ferri-Taylor, Physical Therapist) is a pro. He is great with Alaina. He's the best.

Leeanne (Leeanne Cadwallader, Pediatric Vision Screener) was wonderful! She was great with the children and the staff. She was patient and used her time well! She was willing to unpack her things when there was one forgotten student. Very nice, we look forward to working with her next year.

Wyomi (Wyomi Yonzon Yockey, Pediatric Vision Screener) was new to our school after many years with the same vision screener. We so enjoyed having Wyomi with us and she continued the professional demeanor we have come to expect. The program is by far a blessing and valued by us all. Our continued thanks for providing this service and for sending us qualified and professional screeners.

A coin a day so they can walk, talk, see and play!
