

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Therapy obviously worked as Spencer is very loquacious now. Everyone comments on how well he has done, his teachers, grandmothers etc. He couldn't have done it without Tracy's (Tracy Archipley, Speech-Language Pathologist) help. In addition to speech she also encouraged appropriate behavior which is great. Thank you!!

Tracy was great! We miss her but realize she is helping others in greater need.

Leeanne (Leeanne Cadwallader, Pediatric Vision Screener) was very pleasant and kind to the children and adults. She was very understanding with some of the changes as a Bible study had been scheduled in the same room. It was a very nice experience.

Our family deeply appreciates the California-Hawaii Elks Major Project. Without the services provided to us we would not have been able to find or afford services for our daughter. Hedley (Hedley Uetake, Speech-Language Pathologist) was in our home 3 years ago and did a wonderful job. When she returned this last year she provided professional services and our feeling, concerns and inputs were validated. Although our therapy plan goals were reached, I was still a little hesitant about terminating services. Hedley addressed the anxiety I had and reassured me that if my child regressed or I had concern about her speech before she turns five that I could always call her. We agreed to the goals and discharge plan. We love the service we received from Hedley.

Your project is invaluable to our community and for a family like us who are trying to make ends meet. Our lives have improved because of your services. Thank you from the bottom of our hearts. Aloha!

Thank you again for this wonderful opportunity for our children and parents. We appreciate you so much. We send thanks and appreciation to the Elks for all the great work they do.

Thank you Katie MacKay (Pediatric Vision Screener), you are a total professional. You make the children feel welcome and comfortable for their screenings. Great Job!

A coin a day so they can walk, talk, see and play!
