

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

First of all, me and my family are very thankful to have a program like this. Since my daughter was born, Mindy, Occupational Therapist was already there right away when my daughter was discharged from NICU. Mindy helped a lot to improve my daughter's needs. From feeding, exercise, turning etc. She gives a lot of input to me so I can help my daughter every day. Mindy came to my house once a week. She is a very knowledgeable person and I admire her skills for the kids. We missed her especially my daughter sometimes she's longing for Mindy. Now my daughter is already 9 years old. Again our heartfelt thanks to this program and we are very grateful for Mindy to extend her effort to come to my apartment once a week. I can't even imagine when my daughter was just an infant and Mindy helped me a lot step by step to reach our goal every month until Angel turned 9 years old. Mindy and me are always positive for whatever task we started and my daughter excelled at that task always.

I hope this program will continue to support these kids in need at home it is very helpful for the parents not to go and prepare for therapy. For Mindy we really appreciate very much everything she does for Angel. She is like my family that we always treasure and remember. My daughter really loves her so much, and until now she's still longing for Mindy.

Thank you!! Thank you!! For this program and thank you for the wonderful and intelligent Therapist Mindy.

We have had Elizabeth, Pediatric Vision Screener at our school for quite a number of years and have built a very positive relationship. We appreciate this service you provide. It has proven to be beneficial to our parents. Thank You!

Elizabeth, Pediatric Vision Screener is extremely professional. Her calm patient manner helps ease any anxiety that the students have when having their vision screened. She is prompt and courteous and we are very thankful for having her many years of service to our school.

A coin a day so they can walk, talk, see and play!
