

## NEWS FROM YOUR ELKS MAJOR PROJECT . . .

We loved Physical Therapist Denise from the start. I remember our first meeting where she gave me the confidence that we can do this. She was always willing to go the extra mile. Denise was always willing to explain Sophie's condition. If Sophie wasn't making enough progress Denise always made it her priority to find a way to push her so she could improve. I am extremely blessed and thankful to have Denise as Sophie's PT. I'm not sure if Sophie would have made as much progress. We were very lucky to be referred to her early and with the right therapy. Denise was able to help me help my daughter have a better life. Without the Elks Major Project and Denise this would not be possible. Thank you so much!

We were very pleased with the services Speech-Language Pathologist, Hedley provided. My daughter looked forward to each session and enjoyed all of the activities. I think it was great that the children practiced their skills through play because it kept them more focused on the task. Hedley did a fabulous job in creating fun activities and providing us with tools and techniques to help our daughter. We were very grateful for all the help we received through the California-Hawaii Elks Major Project. Thank You!

This was the second time we had Preschool Vision Screener Kim Anderson and she was great. She is very patient with the children. She is polite and very professional. Hope to have her again next year.

Speech-Language Pathologist Tracy, was wonderful! She was very in tune with my son's needs and was always able to accommodate any appointment changes. Our entire family misses her weekly visits. I sincerely appreciate everything she was able to help my son achieve.

A coin a day so they can walk, talk, see and play!
