

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

The therapy service that Occupational Therapist Pam provided was more than beneficial to my daughter. She went from an extremely picky eater to a well rounded eater. Not only did it help her dietary needs, but the overall therapy helped her with other aspects of life by giving her tools to combat her sensory processing challenges. Her overall stress and anxiety about eating and life in general has reduced significantly. Pam was very helpful, informative, knowledgeable and patient during our therapy sessions. She provided my daughter with benefits that will last a lifetime. Thank you for the program! I'm sure it helps many families as much and more as it did mine.

I felt Physical Therapist Becky helped Evan, I know Evan did not want to do therapy but in the end it did some good for his writing abilities. Thank You for your caring concern and help.

Speech-Language Pathologist Hedley was fantastic with Finn. He looked forward to his meetings with her and enjoyed all the games. I particularly appreciated how she made it fun for him so he wasn't totally aware that he was learning and being evaluated. He just thought he was playing games and then he became aware of how his speech began to improve and was very proud of that fact. We are very grateful to the Elks Major Project and we are so happy to have worked with Hedley. You are offering wonderful opportunities to Hawaiian families. Thank you!
