

## NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Preschool Vision Screener Teresa, has always been polite, professional and extremely helpful to all of us through the years. Thanks to her and your organization, several children per year have gone on to check their eyes at ophthalmologists and have been referred to specialists. If Teresa hadn't detected these issues the problems would not have been noticed until much later.

We are so grateful for Preschool Vision Screener Wyomi to provide this service. She is fantastic! She was able to detect some early vision Problems including one child with a cataract that she had since birth. She is scheduled for surgery this summer. Her parents are so grateful for this program. Our other families are also very impressed and have taken care of their children's vision problems. We see great improvements daily!

My husband and I enjoyed working with Physical Therapist Denise. She has been absolutely beneficial to my daughter Gabriella's physical development. We continue to make progress and set new goals for Gabby when necessary. Denise has always shown patience and compassion to her even on the days Gabby is cranky and doesn't want to participate. My husband and I just want to thank the Elks for accepting my daughter. It took stress and relief off our minds just knowing there is therapy for families with low income. Thank you once again!

Preschool Vision Screener Gina, is an amazing person. She has a gift for what she does. We want to thank the Elks for allowing us to be a part of this free program and thank Gina for always making the experience a delightful one. Your program has helped several of our children get the care they needed for their eyes. God bless you for all you do and God bless Gina for all she does. We will miss seeing you till next year, until then take care.
