

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

This is the first time we have had any interaction with the Elks Major Project. It was wonderful! Speech-Language Pathologist Tracy, is excellent, and compassionate and came to our house in a very difficult time in our lives when it seemed we had hundreds of appointments we had to drive to. We live in a semi-remote area and even when it snowed she tried to make it by putting chains on her car! You have a kind, gentle, hardworking and caring therapist in Tracy and she was a great blessing to us. Thank you!

The parent Connection appreciates the service that you provide to the community. Our preschool vision screener Wyomi is very professional and knowledgeable explaining to the parents what she is doing and what the results are at the young ages of the children. Wyomi is able to capture their attention and have them participate in the screening. Thank you again!

Occupational Therapist Valerie has been a joy to our family for the last 10 months. She is extremely helpful in improving our daughter's ability on becoming a happy little girl. Before we had Valerie I did not know how to help our kiddo. She has made things a lot better for our family. We will miss her as we will be relocating to Los Angeles. Thank you!

We are so pleased and very thankful for the physical therapy our daughter received from Physical Therapist Denise. She went above and beyond by researching and taking classes to provide us with a wide spectrum of treatments and exercises for our daughter's condition. Denise is so friendly and personable and it was a pleasure having her in our home on a regular basis. Denise is a true asset to the California-Hawaii Elks Major Project.

Preschool Vision Screener Teresa, has been excellent in screening our students. I have been present in many and I can tell you that she has been very professional, polite and very patient. Many of our students can't even speak English but her techniques and personality make screening fun for our kids. Thank you!

A coin a day so they can walk, talk, see and play!
