

## NEWS FROM YOUR ELKS MAJOR PROJECT . . .

We are very thankful for all the wonderful ideas and teaching that Speech-Language Pathologist Genie has given us. Jude is doing much better and is getting more confident with every session with Genie. She relates to Jude and keeps him interested in speaking and learning. Thank you very much for this amazing service you offer children!

I think Occupational Therapist Judy has been great. We are still trying to figure out what is going on with my child. She has given us all kind of ideas and outlets. I think we have a ways to go, but with time we will move forward with some of our goals. My child hasn't been the best at cooperating but I guess that goes with the territory. Judy has been able to reach out in many ways to reach her.

Thank you for the services provided to our preschool program. The vision screening provided to our children was incredibly helpful to our families. Your assistance means so much to us but even more was the professionalism of Preschool Vision Screener Teresa as she was the most valuable element of the screening process.

Tracy has been very good with the twins' therapies. I am not sure we haven't set specific time phased goals, which should be good. I appreciate how speech-Language Pathologist Tracy tries to speak in Spanish for the kids. She is also very sweet and patient with them. Of the two Alex is not as matured on his speech as Sophia, but he is making good progress.

We always enjoy having Preschool Vision Screener Katie come and screen our students here at Bell's. We will continue to have the screening done every summer, as long as the service is provided. Thank you very much! You have helped to identify some of our students that have vision impairments, and that has been a tremendous help. Thanks again!
