

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

I can't say enough good things about the work Occupational Therapist Michelle is doing with my son. She is very astute about working with him, moving towards healing and improvement. She is patient and creative in working with the goofiness only an 11 year old boy can dish out. We are so grateful to the Elks for giving our son this gift for a lifetime. He is making great strides and wouldn't have found this anywhere else. Thank you.

Pediatric Vision Screener Didi is wonderful with the children. She was very patient and did not rush them, which I felt that she was then able to get a very accurate reading. I also appreciated the fact that she finished up her paperwork and reports onsite after the screening was complete. This allowed us to get the information out to our parents in a very timely manner. We look forward to working with her next year. Thank you.

We love Aunty Hedley, the Speech Language Pathologist. Her skills are so professional yet caring and understanding to our son's needs. She knows how to regain focus with our son and always has fun and also brings great positive energy with her. Her activities are always engaging and age appropriate. Thank you to the California-Hawaii Elks Major Project for this wonderful service that really helps our son.

Lea the Physical Therapist, has been wonderful. I love how creative she is and utilizes items and areas around our home and yard to create obstacle courses and keep Mckenna and her brother, who also receives therapy, interested in the sessions. She introduces new ideas and activities every week and the kids are so excited to see what the next week has to offer.
