

NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Occupational Therapist Jamie did an amazing job with "Turtle". Jamie provided our family with many great ideas to help. Her suggestions were very beneficial to his development and he wouldn't have made all the progress he has made without Jamie and her patience, willingness to demonstrate different techniques and to help Turtle cope with different challenges.

Pediatric Vision Screener Didi is very professional and thorough. She was extremely kind and patient with the children which is very important because for most of the children this experience is the first time they have had their eyes checked.

Jocelyn, Speech and Language Pathologist is very patient and gives us an understanding on how to work with our son using reinforcement as well as games. He enjoys when Jocelyn comes because she has games to play which help with his directional learning as well as other practice therapies to improve his speech, fine motor etc. We are grateful for the therapy sessions!

Physical Therapist, Lisa is very helpful for our child and we appreciate all of her help for our son. We can't thank her enough for this progress. He exceeded his goals and was able to meet his developmental milestones because of Lisa's help.

* * * * *

Occupational Therapist Valerie gives great direction for teaching me and my child different ways to strengthen small motor skills. She always provides a list of skills or activities to work on throughout the following week which is incredibly helpful. Valerie is always engaging.

A coin a day so they can walk, talk, see and play!
